EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

Claim 13, line 1, "and" has been deleted.

Claim 15, line 2, "measurement" has been changed to --measurements--.

2. The following is an examiner's statement of reasons for allowance: a method and apparatus for generated a desired frequency signal are disclosed. The closest prior art Landman et al, US patent No. 6,028,488, discloses similar method and apparatus. However, Landman et al does not teach or fairly suggest the limitations of "multiple control circuits each coupled to a respective one of said groups of capacitors, where the multiple control circuits sequentially control the respective groups of capacitors responsive to a phase error signal during sequential modes; and a phase detection circuit for generating the phase error signal, said phase detection circuit including circuitry for setting the phase error signal to a predetermined value responsive to a mode switch signal.", as recited in the base claims, are neither anticipated nor rendered obvious by Landman et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
